A series of overlapping, flowing blue lines in various shades (light blue, medium blue, dark blue) that sweep across the slide from left to right, creating a sense of movement and depth.

# New Emphasis on Healthcare Quality in the UK and how clinical labs are contributing

Lesley Wright  
Director - NHSIQ

## **Introducing NHS IQ**

- **Improving health outcomes across England by providing improvement and change expertise**
- Nationally funded programme, established in 2000  
April 2013, 5 improvement organisations hosted by NHS England
- An evidence-based organisation that is aligned to the current needs and challenges of the NHS
- Creating one improvement organisation to build on the wealth of knowledge, expertise and experience that has gone before.

## Our vision

We will demonstrate value and strength by being:

- The **'go-to' organisation** leading improvement in England
- A **catalyst** for change
- A **partner** to drive transformation in the NHS
- A **focal point** for the system - creating impact through connectivity and support.

- Does UK have anything in common with USA ?
- England and America are two countries separated by the same language.
  - George Bernard Shaw

McDonald's!!!

- What is quality ?

How do we define quality ?

How do we measure quality ?

What is value ?

How do we define value ?

How do we measure value ?

# Quality is an issue in healthcare !

## CQC publishes suppressed report on Morecambe Bay inspections

Internal review says that with the benefit of hindsight there were possible indications that may have triggered investigation

**Donald Berwick**

**Donald Berwick**

Professor Donald M Berwick, MD  
President, CEO co-founder of Institute for  
Healthcare Improvement in Boston  
Massachusetts  
Clinical Professor of Paediatrics and  
Healthcare Policy at Harvard Medical  
School

----

Chair an Advisory Group to recommend  
some important actions that leaders,  
clinicians, professional bodies,  
government agencies, others..  
' to improve the quality and safety of care  
in NHS'

## The report

# A promise to Learn- A commitment to Act: Improving the safety of patients in England

August 6<sup>th</sup> 2013  
Don Berwick

## The problems

- Patient safety problems exist throughout the NHS
- NHS Staff are not to blame
- Incorrect priorities do damage
- Warning signals abounded and were not heeded
- Responsibility is diffused and therefore not clearly owned
- Improvement requires a system of support
- Fear is toxic to both safety and improvement

# The Solutions

- Recognise with clarity and courage the need for **wide systematic change**
- **Abandon blame** as a tool
- Reassert the primacy **of working with patients and carers** to set and achieve health care goals
- Use quantitative targets with **caution**
- Recognise the **transparency** is essential
- Ensure **responsibility** for functions related to safety and improvement are vested clearly and simply
- Give the people of the NHS career-long help **to learn, master and apply** modern methods for quality control, quality improvement and quality planning
- Make sure **pride and joy** in work, not fear, infuse the NHS

# Messages

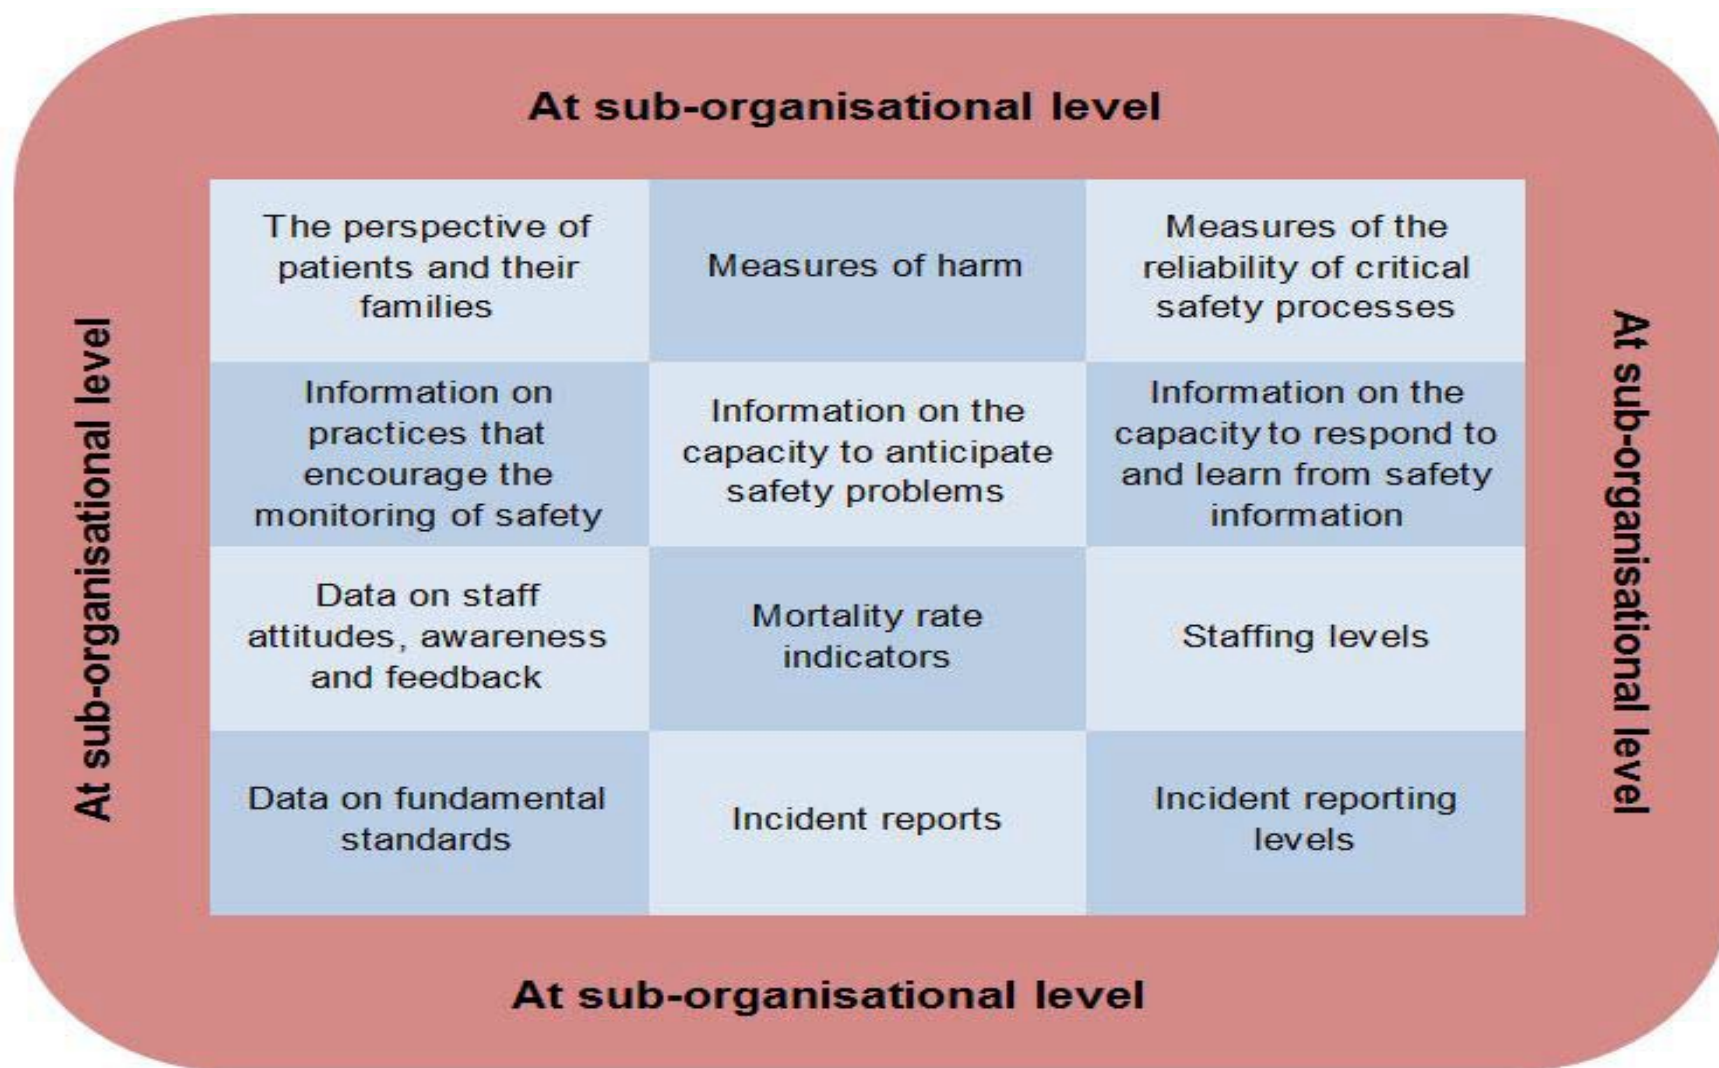

- 10 recommendations
- 3 letters
  - Senior Government Officials and Senior Executives in the health Service
  - Clinicians, managers and all staff of the NHS
  - The people of England

# Recommendations

- Place the quality and safety of patient care above all other aims for the NHS ( This is your safest and best route to lower cost)
- Engage, empower and hear patients and carers throughout the entire system and, at all times
- Foster wholeheartedly the growth and development of all staff, especially with regard to their ability and opportunity to improve the processes within which they work
- Insist upon, and model in your own work, thorough and unequivocal transparency, in the service of accountability, trust, and the growth of knowledge

I urge you to focus on the culture that you want to nurture: buoyant, curious, sharing, open-minded, and ambitious

# Indicators to assess safety improvement and variation

# Quality for the NHS

- **Safety:**  
avoiding harm from the care that is intended to help
- **Effectiveness:**  
aligning care with science and ensuring efficiency
- **Patient experience:**  
including patient – centredness, timeliness and equity

Culture will trump **rules, standards** and **control strategies** every single time.

A safer NHS will depend far more on **major cultural change** than on a new regulatory regime

## Other drivers....

- FINANCE – NO MONEY
- NHS £100 billion budget
  - £ 20 billion efficiency savings by 2014/15
  - £ 50 billion efficiency savings by 2020
- Patient expectations
  - Internet

## Ageing population

## Obesity

# Demographic change

2010

2040

# NHS Outcomes Framework

Domain 1	Preventing people from dying prematurely;
Domain 2	Enhancing quality of life for people with long-term conditions;
Domain 3	Helping people to recover from episodes of ill health or following injury;
Domain 4	Ensuring that people have a positive experience of care; and
Domain 5	Treating and caring for people in a safe environment; and protecting them from avoidable harm.

“The NHS will move towards routine services being available seven days a week. This is essential to offer a much more patient-focused service and also offers the opportunity to improve clinical outcomes and reduce costs”

**Sir Bruce Keogh – NHS Medical Director – NHS England**

## Factors driving change

**Political** – local, national, European, Global

**Economic** – local, national, European, Global

**Social** – increasing life expectancy, increasing retirement age, demographics

**Technological** – new technology, access and speed of information

# The focus for pathology

- End to end value stream
  - transport, porters, vacuum systems,
  - Electronic order comms, voice recognition, telemedicine, digital pathology
  - user/patient engagement
- Cost effective:
  - economy of flow, v economy of scale
  - keep patient/sample moving
  - cheap tests or expensive beds / OP appointments
- Lateral impact
  - seeing the wider benefit of the diagnostic investigation and results

# Flow v Scale !!

## Economies of Scale

- Unit cost

$$\frac{\text{Cost}}{\text{Output (activity)}}$$

Big batch

How long does it take to fill the machine?  
Where is the Cost of the Work in Progress accounted for?

## Economies of Flow

Throughput (activity)

Less scrap and rework

Less Work in Progress

= Effective work

Salaries

+ Intellectual depreciation (training)

+ Capital depreciation

+ Utilities

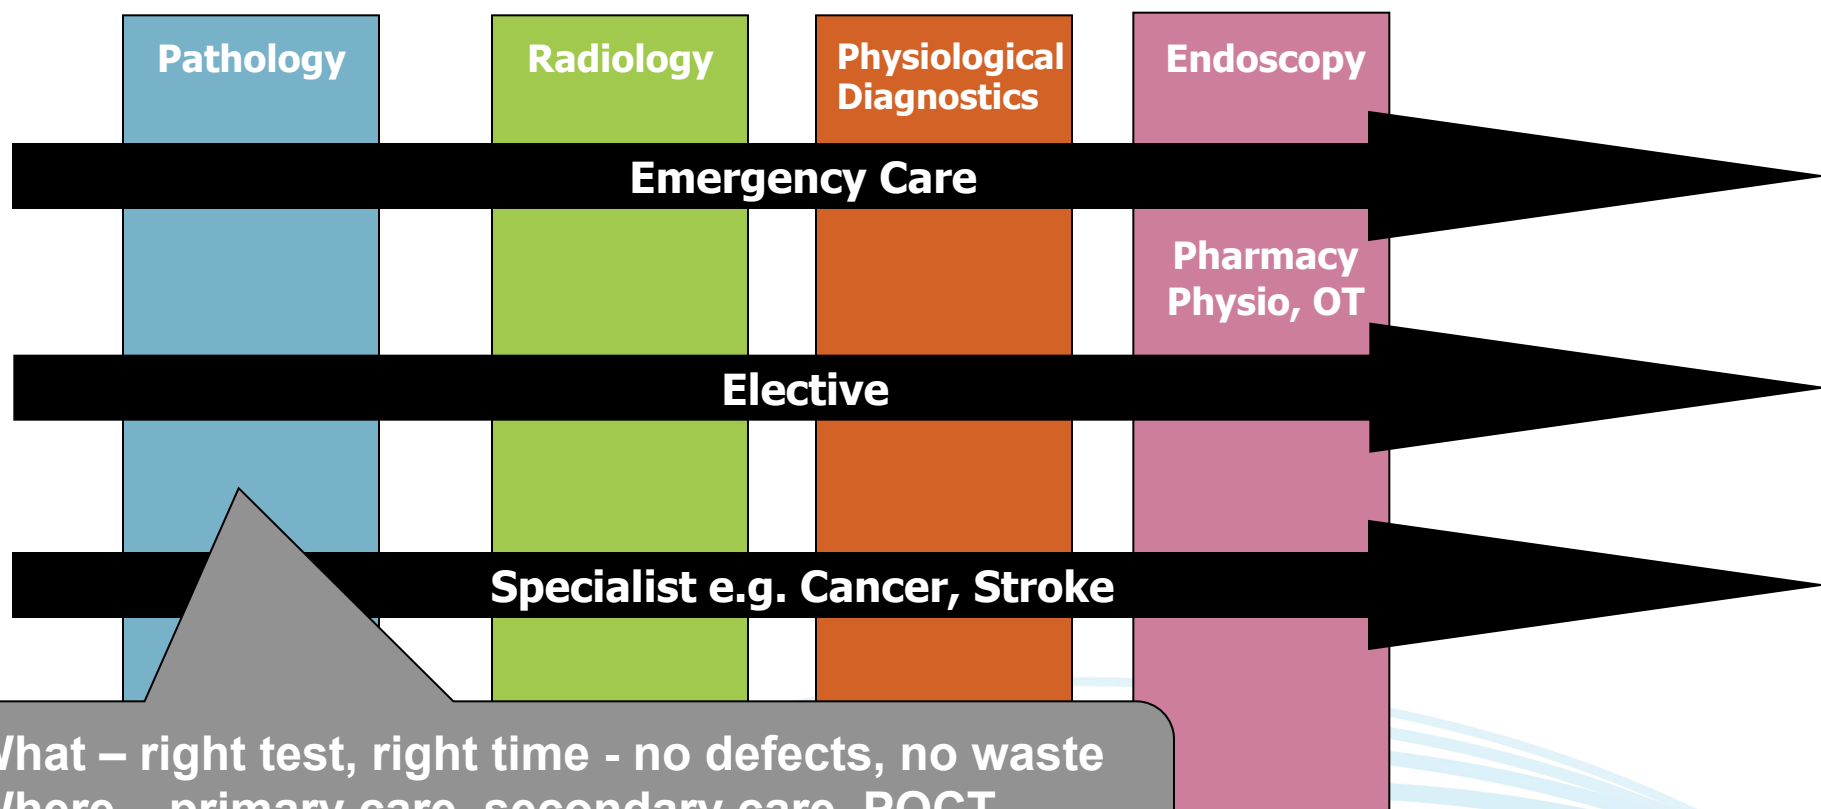

+ Materials

= Total cost.

One piece flow Little machines

# Value Streams (Clinical Pathways)

What – right test, right time - no defects, no waste  
 Where – primary care, secondary care, POCT  
 When – guaranteed predictable TAT's

# Shared learning from NHS Improvement

**NHS Improvement**

- CANCER
- DIAGNOSTICS
- HEART
- LUNG
- STROKE

Learning how to achieve a seven day turnaround time in histopathology

*"Clinical excellence in partnership with process excellence"*

**NHS Improvement**

- CANCER
- DIAGNOSTICS
- HEART
- LUNG
- STROKE

NHS Cervical Screening Programme (NHSCSP)

Cytology improvement guide - achieving a 14 day turnaround time in cytology

*"Clinical excellence in partnership with process excellence"*

**NHS Improvement**

Diagnosics

NHS Improvement - Diagnostics

First steps in improving phlebotomy: The challenge to improve quality, productivity and patient experience

May 2011

**NHS Improvement**

- CANCER
- DIAGNOSTICS
- HEART
- LUNG
- STROKE

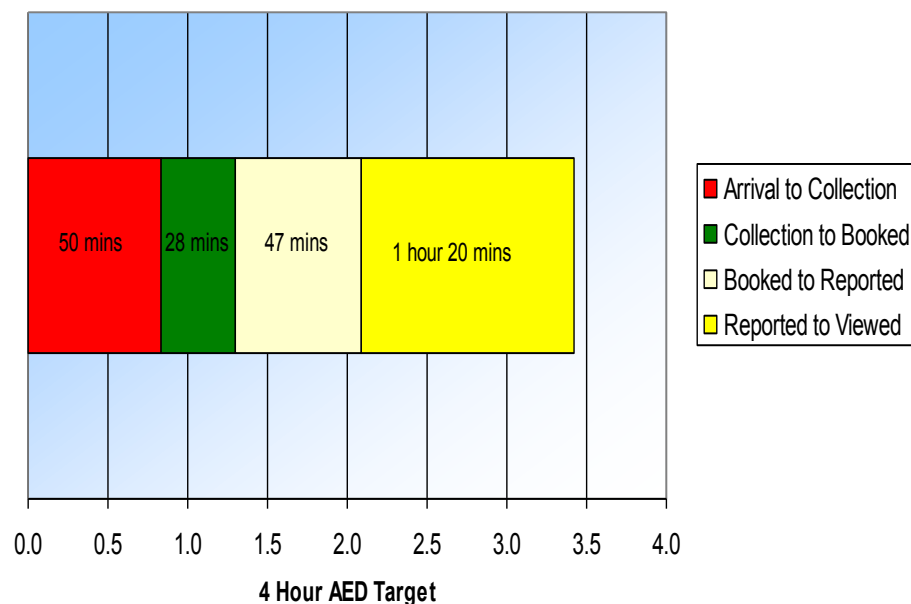

NHS Cervical Screening Programme (NHSCSP)

Continuous improvement in cytology: sustaining and accelerating improvement

*"Clinical excellence in partnership with process excellence"*

# Impact of Phlebotomy on AED

Time from Arrival in Dept to Result Viewed

## AED Blood Pathway changes

- POD reliability improved
- Phlebotomists in AED 2 days / week (£48 per day)
- A&E given guaranteed of result TAT

## Admissions to EAU reduced

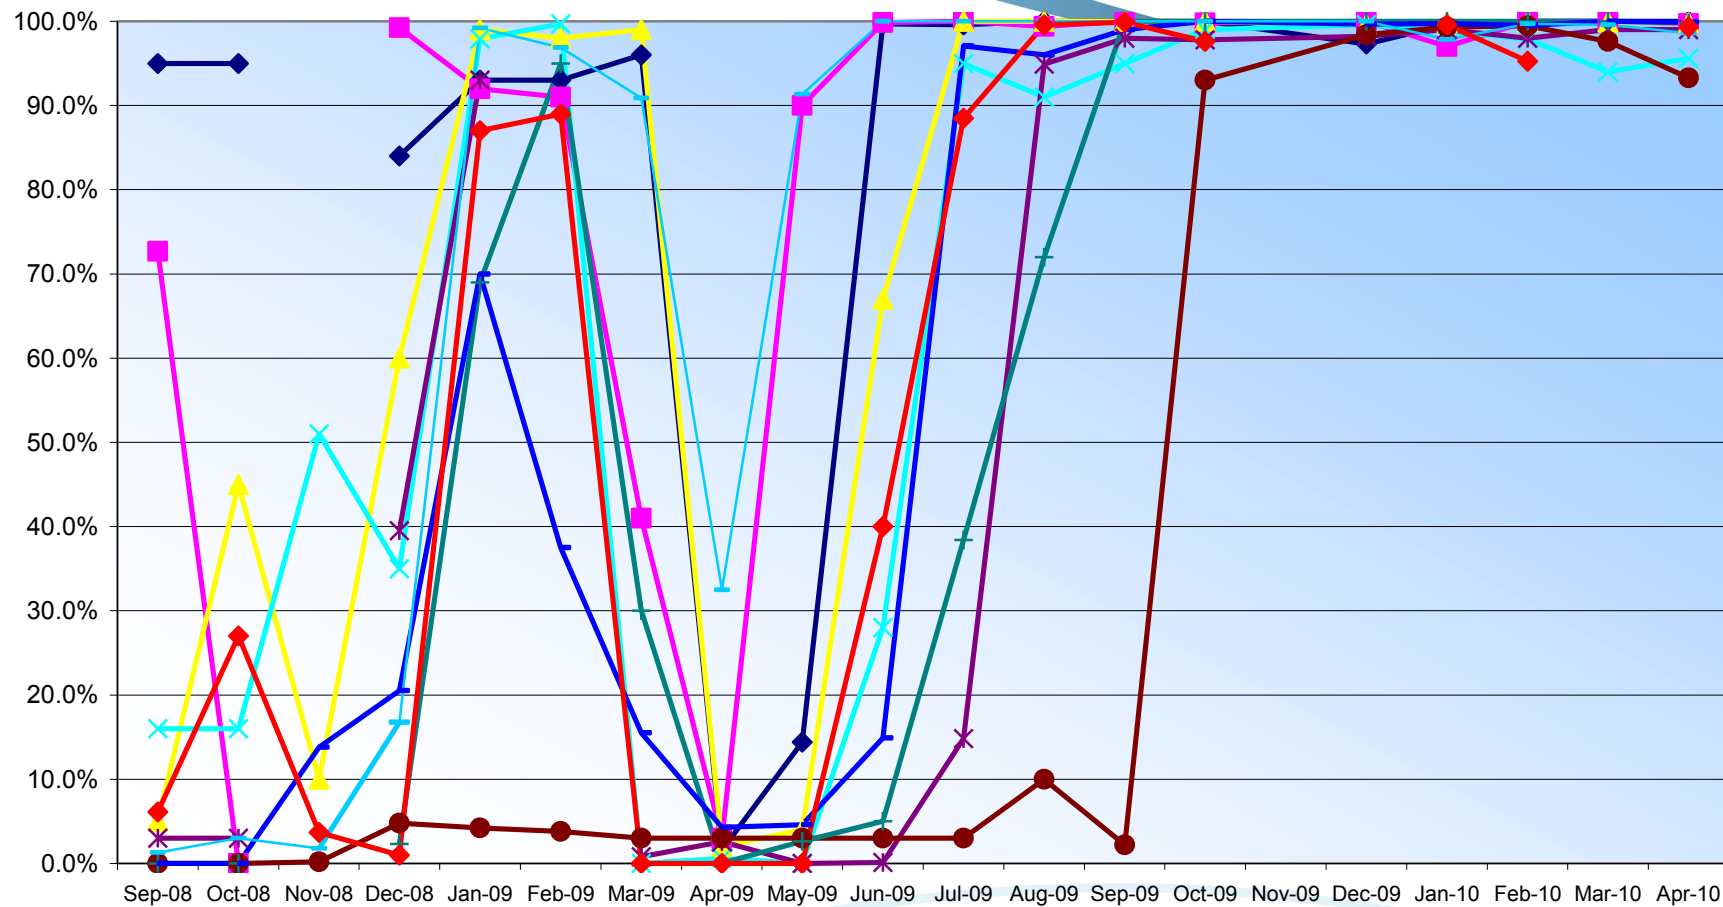

- by 5% ( 20 – 15% )
- 5% due to Blood Results not available: approx 18 admissions per week

## Cost saving:

- Based on LOS of 1 day @ £250 Per day: £234k p.a.

# Phase 1 Cytology % in 14 Day Turnaround

*Improving Quality*

◆ Addenbrooks (Newmarket)

◆ Ashford & St. Peters (Chertsey)

◆ Barts & The London

◆ Hull RI

◆ Leeds

◆ Manchester

◆ Musgrove Park (Taunton)

◆ Norfolk & Norwich

◆ Northwick Park (NW London)

◆ Pennine (Oldham)

# Cytology – Pilot sites

## Quality

- Guaranteed Predictable Turn around times
- Reduced defects, improved safety

## Innovation

- Robust problem solving via A3 thinking
- Applying Lean principles across the pathway

## Productivity

- Reduce waste – potential cost efficiencies identified
- £ Savings c. £100K per site
- >10 million waiting days removed

## Prevention

- Impact on **650,000** + women ( Pilot )
- 358,000** ( Prototype) **3 million** ( Spread)
- Guaranteed to be on pathway in < 2 weeks

# Boxplots from Pilot Site Baseline Data

Overall TAT Significantly Impacted by Median, Range & Outliers at Reporting Stage

Whipps X

Musgrove Park

North Middx

Birmingham

North Tees

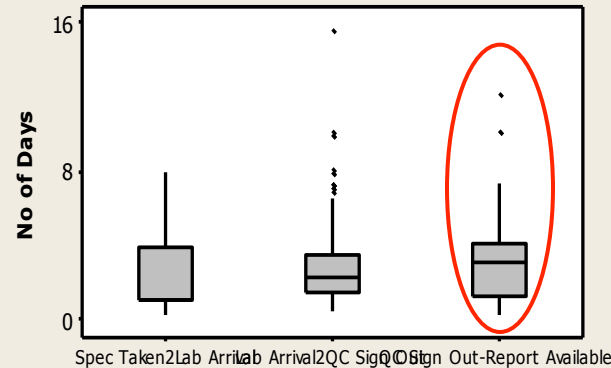

Leeds

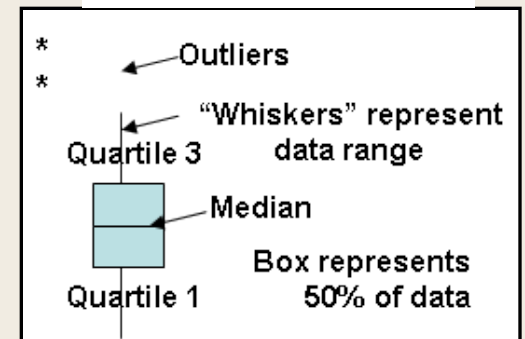

NWLH

Derby

## EXAMPLE

No Boxplot for UCLH as tim gates not logged

# Lateral Impact of 7 day Histopathology

- MDT meetings
  - reports available – time saving for MDT co-ordinators,
  - 15 MDT's                      250 hours per annum                      = **£3,760**
  - NHS England                      = **£564,000**
  
- Dermatology: 300 OP appointments per annum                      = **£22,500**  
 NHS England: 45,000 appointments per annum                      = **£3.375m**
  
- Urology:
  - Biopsy Friday, MDT Tuesday am, Patient informed Tuesday pm
  
- “ Changes made in Histopathology have changed the service beyond recognition. Reducing the need for follow up clinic slots”
  - Consultant Gastroenterologist – July 2010

## Reduced follow up Out patient appointments

‘When I see complex surgical patients for suture removal at one week, I can also now give them their result (including the Moh’s patients) and therefore discharge them straight away which means one less follow-up’

Consultant Dermatologist

Impact:

25 fewer outpatient slots required per month, charged at £60 each to PCT (total £1500)

Decorative blue wavy lines at the bottom of the slide.

## Royal College of Pathologists – KPI's

- RCP acknowledged the urgent need to reform pathology services to achieve more efficient use of resources without reduction in quality.
- KPI's established in 2012:
  - End to end pathology service
  - Biochemistry, haematology and medical Microbiology and Virology clinical advice to be available 24 hours / day 365 days/ year
  - 90% of core investigations from A&E Emergency care within 1 hour of sample collection
  - Standardised user satisfaction survey
  - Consultant, Clinical Scientific staff appraisal
  - <http://www.rcpath.org/clinical-effectiveness/kpi>

# Royal College of Pathologists Curriculum

- Service improvement:
  - one of the five domains of the Medical Leadership Competency Framework incorporated into the Royal College of Pathologists' 2010 Histopathology curriculum.
- Entrants to training from August 2010 onwards are obliged to follow this curriculum.

# Royal College of Pathologists curriculum

- NHS Improvement lead the first training programme in service improvement for specialist trainees – (Nov 2011)
- 15 projects, quantifiable improvements
- A3 thinking
- Go see, ask why, respect people
- Human dimensions of change
- Coaching from a mentor

# Training programme

Prior to attending:

- All trainees are to follow a gastric biopsy from specimen collection to report authorisation and document:
- Times and dates of key steps in the pathway
- Any points where there are delays/waits with some quantitative assessment of the greatest delay
- In addition, they will be asked to submit ideas for improvement projects based on the specimen walk

## Programme format

- Early September
  - Issue preliminary documentation of programme to trainees
- Mid September
  - Webex explaining objectives of workshop advice how to undertake a 'go see' specimen walk
- Early November
  - 2 day intensive lean training workshop
- December
  - Presentation of results to RCPATH day for Heads of School and Deaneries
- Mid January
  - Trainees to present projects to each other
- February
  - Frontiers in Laboratory Medicine Conference (FILM) presentation of training pilot/poster of best trainee project

# Leadership and sustainability

John Toussaint –CEO, ThedaCare, Wisconsin, On the Mend

An effort that slashed errors and improved patient outcomes, raised staff morale and saved **\$27m** in costs – **no lay offs**

“In the end the enemy of our improvement efforts **was us**. Leadership was treating each improvement initiative as time limited, Improvements ended when a project was over because nobody was in charge of sustaining change and measuring results”

“Quality and efficiency are inextricably linked in a truly lean organisation”

“ Teams are continually reminded to consider the patient **FIRST**”

“ “In order to change outcomes, leaders at Theadcare needed to change”

# Lean Leadership Programme

## **Aim:**

Accelerate the spread of Lean Thinking across NHS Pathology Services in England by developing a cohort of opinion leaders with the skills to lead Lean transformation, linked via a network of exemplar sites

**Input:** 50 Pathology senior managers and clinicians (25 x 2 waves)

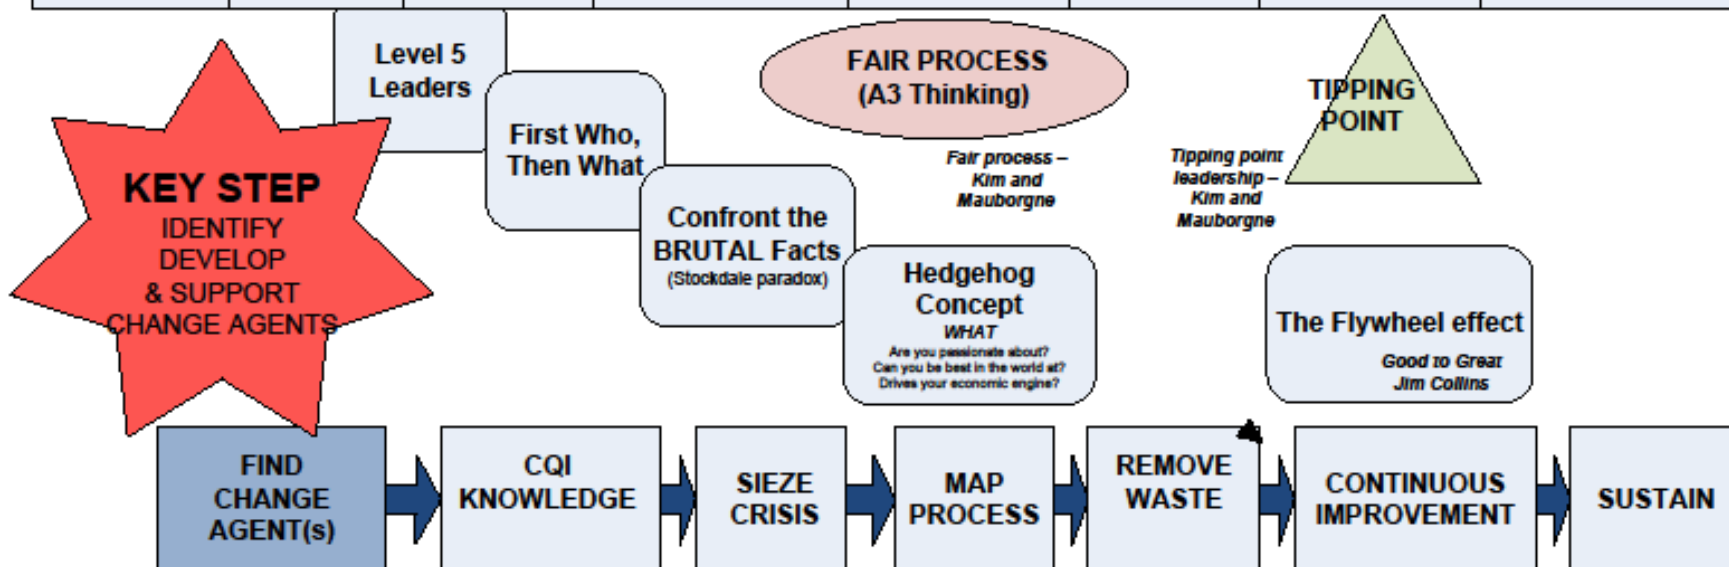

Phase 1: Learning how to apply Lean Principles

Phase 2: Learning how to coach a team to apply Lean Principles

**Time scale:** Sept 2012 – March 2013

# Developing a Continuous Quality Improvement (CQI) Management Culture in Pathology

**CULTURAL TRANSFORMATION** (by acting the way to a new way of thinking)

## Programme – Input

- Preparation for participation – CEO support
- Human Dimensions of Change
- Lean Leadership behaviours
- Measurement / data for improvement
- 2 day training programme
- A3 problem solving
- Webex support, Reading for readiness
- Exemplar visits
- Coaching from team

## Programme – Output

- Project A3
- Planned improvement outcomes linked to QIPP
- Measures for quality, safety, cost, delivery
- Evidence of embedding into the culture of the department

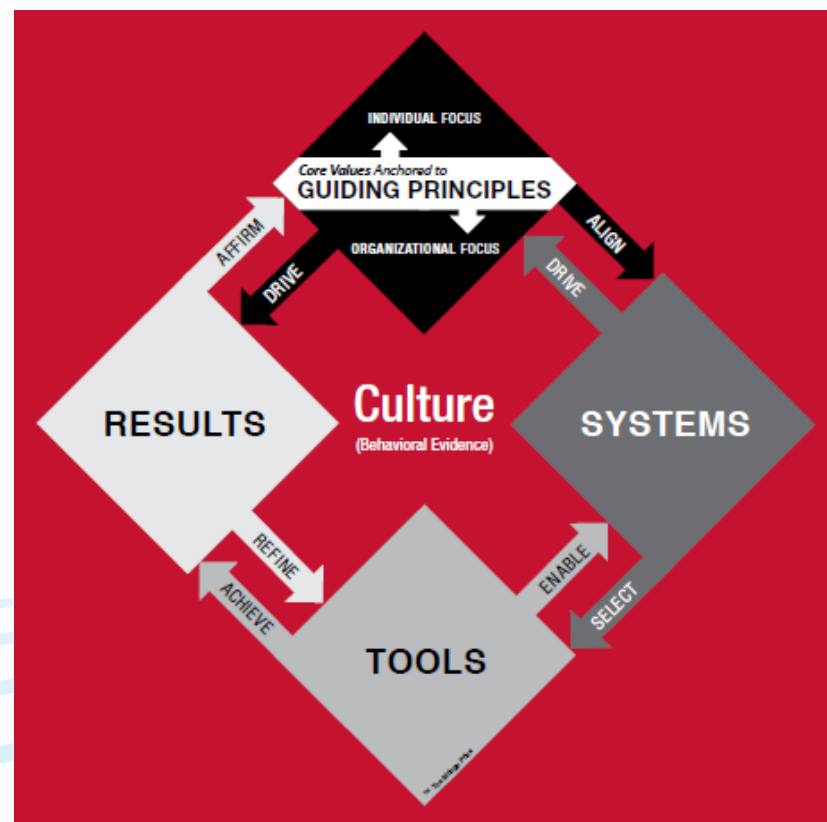

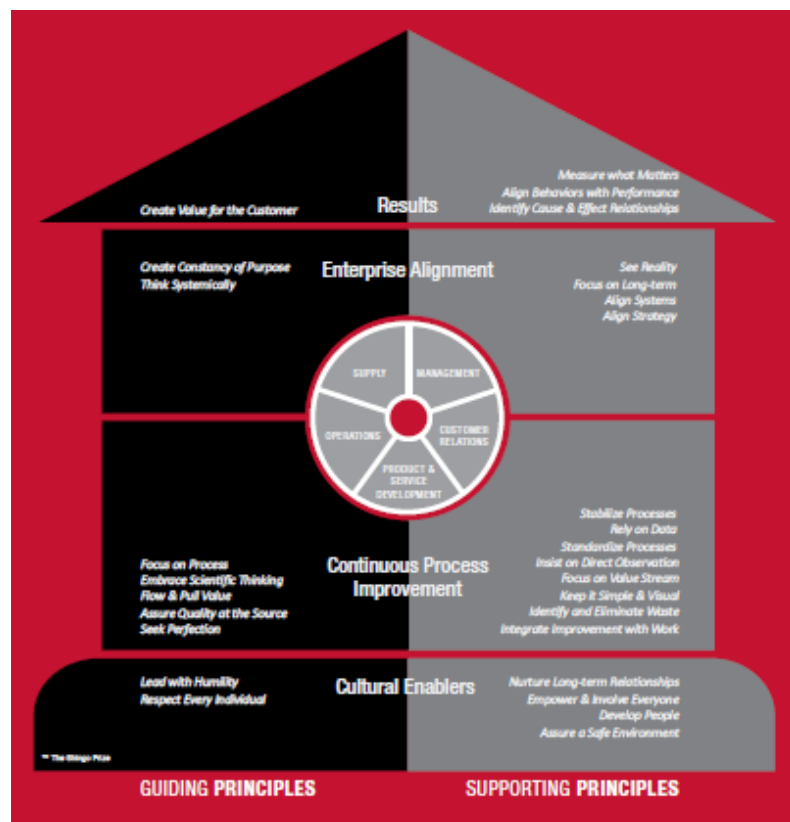

## Programme measures

- % of leaders completing the programme
- % of projects completing programme aims
- % reduction in defects
- % increase score in engagement survey
- % improvement in productivity
- % reduction of inappropriate testing
- Cost reduction opportunities
- Evidence of voice of the customers is at the heart of the project

## Spread – Need for Exemplar sites

- Support the CQI leadership programme – ‘inspire and motivate’
- Demonstrate :
  - Highest productivity of resources
  - Leadership for change using improvement methodology
  - Transparent measurement
  - A patient focussed approach with user engagement
  - A ‘can do’ culture of all staff engagement
  - Daily problems solving
  - A place to go see improvement in action

# Shingo Model

# Shingo operational Excellence

- Internationally award for operational excellence based on four principles:
  - Cultural Enablers
  - Continuous Quality improvement
  - Enterprise alignment
  - Results
- Awarded to industry, business, military and now healthcare
  - Lake Region medical Ltd - USA – producers of diagnostic guide wires
  - Patriot Missile - Red River Army Depot
  - Denver Healthcare
- Shingo mission is to:  
'create excellence in organizations through the application of universally accepted principles of operational excellence, alignment of management systems, and the wise application of improvement techniques across the entire organizational enterprise'

# Cultural Enablers

## **Principles**

- Respect every individual

## **Supporting concepts:**

- Assure a safe environment
- Develop people
- Empower and involve everyone

# Continuous Quality Improvement

## **Principles:**

- Focus on process
- Embrace scientific thinking
- Flow and pull value
- Assure quality at source
- Seek perfection

## **Supporting concepts:**

- Stabilise the process
- Rely on data and facts
- Standardise processes
- Insist on direct observation
- Focus on value stream
- Identify and eliminate waste
- No defects passed forward
- Integrate improvement with work

# Enterprise Alignment

## **Principles:**

- Create constancy of purpose
- Think systematically

## **Supporting concepts:**

- See reality
- Focus on long term
- Align systems
- Align strategy
- Standardise daily management

# Results

## **Principles:**

- Create value for the customer

## **Supporting concepts:**

- Measure what matters
- Directly tied to strategic priorities
- Simple and easy to capture
- Timely and linked to work cycle
- Drive improvement
- Align behaviours with performance
- Identify cause and effect relationships
- Create value for the customer

## The reality

- Pressure on the cost of delivering healthcare is here for good
- Ever increasing public expectations of waiting and better outcomes is a fact of life
- Most effective way to reduce costs is to continuously improve the quality of the processes that deliver the service.

**Continuous Quality Improvement**
